The background of the entire image is a dense, intricate marbled paper pattern. It features a complex arrangement of dark grey, black, and white swirling shapes, resembling stone or organic cells. Interspersed within these larger forms are thin, irregular veins of bright red and yellow. The overall effect is a rich, textured, and visually busy surface.

TEETH FILLED WITHOUT PAIN. THE LATEST METHODS.

---

Come and try our New Anæsthetic for Painless Extraction of Teeth. It takes the place of Ether. (Ether administered if desired.)

### SCIENTIFIC DENTISTRY.

Something new: TEETH WITHOUT PLATES OR REMOVABLE BRIDGE WORK. This improvement does away with the large suction plates in common use; being constructed on true mechanical principles, fit the mouth with perfect accuracy. Any number of teeth can be put in without extracting any good teeth you may have; and no plate in the roof of the mouth, and never drop when eating or talking. The NATURAL TASTE and SPEECH are preserved by this new method, and, furthermore, partial lower sets have not, and cannot, be successfully made by any other method.

# Carbutt's Columbian Plates

FOR THE PREVENTION OF HALATION,

Are supplied coated with Eclipse, Orthochromatic and Special Emulsion, Sens. 23 to 27. The **Orthochromatic-Columbian** is theoretically and practically the long-looked-for perfect plate. Orthochromatization, as is now well known, corrects the color values, rendering them in their true relation to one another in monochrome, and our new **Columbian Backing** (applied to the plate in our factory), completely eliminates all halation. Yet no change is required in the methods of exposure and development usual with plain bromide plates.

Carbutt's Dry Plates and Flexible Films are to be obtained from all dealers in Photo Materials. Price Lists, List of Brands and Circulars will be mailed direct from factory, when they cannot be obtained from the local dealer. Ask for our circular on Columbian Plates.

Manufactured by JOHN CARBUTT,

Pioneer Manufacturer of Gelatino-Bromide and Orthochromatic  
Plates in America.

KEYSTONE DRY PLATE AND FILM WORKS,  
WAYNE JUNCTION, PHILADELPHIA.

## CRAMER'S ISOCHROMATIC PLATES.

Surpass all other plates of equal rapidity, in sensitiveness to yellow, orange and green.

### **The Instantaneous and Medium Isochromatics**

Are unexcelled for portraits, landscapes and general work, yielding negatives of superior quality without the use of a color screen. **Try them and be convinced.**

They develop and fix very readily, needing no extra precaution, other than to protect them carefully against too much light while developing.

The "**Slow**" **Isochromatic** is particularly recommended for the reproduction of paintings where the fullest sensitiveness to colors is imperative.

## CRAMER'S LIGHTNING PLATES.

The highest prizes at our latest conventions were carried off by photographers using these plates.

They have been greatly improved, and now combine the fine qualities for which the Cramer plates are renowned, with the greatest ease in developing and fixing.

No trouble to make bold and brilliant negatives.

The "**Anchor**" Brand is suitable for landscapes, copying and photo-mechanical work.

The "**Banner**" Brand takes the lead for general portrait work, combining high sensitiveness with great latitude in exposure.

The "**Crown**" Brand is the most rapid plate made.

## TRANSPARENCY PLATES

For Lantern Slides.

## STRIPPING PLATES

For Photo-Mechanical Work.

# Successful Results

in photography are easily attained by using proper materials.

**WHEN YOU VISIT THE WORLD'S FAIR** inquire of some one posted which are **THE MOST RELIABLE CAMERAS AND FILMS**, and select your outfit accordingly.

**BLAIR'S FILM** in rolls affords the only reliable medium for making a large number of continuous exposures without reloading the Camera. It is **CLEAN, QUICK and UNIFORM**, and safe for all seasons, as it **WILL NEVER FRILL**.

**OTHER FILMS** have joints or seams (which generally appear in the best negatives), and if they can be properly developed in warm weather without frilling, the user has good reason for self-congratulation.

**BLAIR'S CAMERAS**, notably the *HAWK-EYE, Folding HAWK-EYE* and *KAMARET*, are recognized **LEADERS**. The "**COLUMBUS**" and "**THE 400**" are the very latest models, designed especially for World's Fair visitors, and are positively **MORE COMPACT** than any Cameras in the world of equal capacity, viz.: one hundred 4x5 pictures without **RELOADING**.

**OUR CHICAGO HOUSE**, *245 STATE STREET, will be the World's Fair headquarters for everything pertaining to photography. Cameras for sale; Cameras to rent; Cameras loaded; Cameras repaired (seldom required if a Blair); Negatives developed; Pictures printed, etc.*

A HIGH CLASS ILLUSTRATED MONTHLY MAGAZINE OF  
FASHION AND LITERATURE.

Issued by FORBES & WALLACE, Springfield, at 5 cents a  
number, 50 cents a year.

The illustrations are artistic and graceful pictures, the work of  
the best engravers. The purpose of the magazine is to be of real  
use to those who study its pages for ideas upon fashion, and to be  
widely consulted as an adviser in dress.

The best writers of the day contribute to its literary pages.

# 40% More Victors

Are ridden in Springfield than any other Bicycle, according to the '93 edition of the Springfield Bicycle Directory, just issued.

Could such great popularity exist in the face of fierce competition without genuine superiority and merit?

This is a Victor year.
